News Release

Appointment of Aryse Global Services, Madrid

MPL Technology Group is pleased to announce the appointment of Aryse Global Services as an Elite Partner (EPP) for Europe.

Any meaningful Sustainability Programme must include the measurement, reporting, understanding and continuous improvement in the efficiency of all power and energy related parameters across the clients entire Estate.

For two decades, MPL Technology Group has been at the forefront in the provision of leading edge technology to monitor and manage all power, energy, and environmental conditions. These solutions are deployed across a wide variety of market sectors in applications where resilience, accuracy, reliability, cost management, sustainability and carbon reduction are of primary concern.

Aryse bring a wealth of related experience and resource to ensure that end user clients can have the MPL solutions deployed seamlessly and on time, with the peace of mind that through every stage of design, deployment and post installation, the right level of support is on hand.

Both companies share a passion for delivering simplified business intelligence and together will drive the N-GEN Estate Management Platform across new and exciting opportunities.

With the on-boarding process complete and a number of successful projects already secured and delivered, the partnership will continue to become stronger and more meaningful to the market.
